

Croda Animal Testing Statement

As a responsible global manufacturer of speciality ingredients, Croda is committed to the reduction, refinement, and replacement of animal testing across our portfolio. Animal testing on products may be required to meet legal requirements such as national or regional chemical safety regulations. Scientific testing may be required for substances in specific pharmaceutical applications but will only be approved in limited circumstances and where no accepted alternative exists.

Croda is committed to the long-term goal of replacing animal testing and is working with external bodies such as the International Collaboration on Cosmetic Safety (ICCS) to progress validated alternatives.
